

WHO WE ARE

Launched in 2003 and based in Ohio, American Utility Processing (AUP) specializes in the processing of ferrous and non-ferrous coiled materials. We are committed to offering leveling and correction services of primary and secondary metals at a quality standard unmatched by conventional methods. Our unique processing abilities, process controls, and value added services result in increased customer satisfaction and supply chain performance.

With our Stretcher and Roller Leveling cut to length lines, multiple Buffing lines, Precision Re-leveling line, and a 102" heavy gage Slitting line, we are able to process a wide assortment of metals.

Housed in over 100,000 square feet of facility space with a planned expansion of 40,000 square-feet, we reinvest, not only in our plant, but also in state-of-the-art equipment and experienced personnel, to ensure that we continue to provide the best service and quality to our customers.

For companies whose processes require tight quality controls, partnering with American Utility Processing is a strategic imperative.

Is flatness critical for your application?

Tired of sheets not staying flat?

Trying to reduce losses?

Are you in need of a quick turnaround?

Looking for better customer service?

If the answer is "yes," then partnering with American Utility Processing is a STRATEGIC IMPERATIVE.

WHY CHOOSE AUP?

Quality Assurance

Backed by our experienced personnel, our unique processing equipment and exceptional quality control standards, we are able to offer premium services to our customers. To help ensure zero customer field claims, we maintain tight process controls and provide our customers with feedback so you can “see what we see” prior to any material leaving our facility. AUP is an ISO 9001 certified company.

Quick Turnaround and Delivery

Our team ensures customer promise dates are met. In addition, with AUP truck carrier services, we can assist with faster delivery of processed materials.

Coil Shape Correction, Sheet Stress Relief, Flatness Matters!

Our processing lines improve coil quality by mitigating camber, oil canning, arbor breaks, edge wave and center buckle. Our unique stretch sequencing and precision leveling services reduce or eliminate internal stresses that cause spring back in coil, sheet, and flat parts. Traditional leveling can improve flatness up to 150/200 I-Units (wave peak to peak flatness measurement) and our stretch leveling can improve flatness up to 3000 I-Units. Eliminating material stresses and ensuring flatness allows for easier shearing, punching, laser cutting, forming and welding. So there is less scrap and less customer machine down time!

Slitting/Edge Trimming

Our slitting line is one of the widest in the country and can process heavier gage materials. Paired with our other services, partnering with AUP will streamline your supply chain.

Reduction in Scrap Loss

Our special stretching sequence can correct prime and secondary coil conditions, outperforming most other leveling technologies. This results in lower scrap losses by reducing or eliminating defects that normally would need to be cut away.

Buffing Services

Our buffing lines can accommodate widths up to 96” and lengths up to 480”. The unique buffing heads and advanced controls are versatile, which ensures a consistent buffed finish that matches specific customer requirements.

Ancillary Services

AUP offers its' customers Scrap Management, Quality Control Monitoring/Feedback, Customized Packaging, and Storage.

CAPABILITIES

		Gage (in.)	Width max (in.)	Length max (in.)	Coil Wt max/min (lbs)
Coil Edge Trimming	Alum/Stain	.125 thru .375	102	-	50,000 / 10,000
Coil Slitting	Aluminum	.080 thru .250	102	-	50,000 / 10,000
	Stainless	.080 thru .250	102	-	50,000 / 10,000
Coil Break Down Only	Alum/Stain	.080 thru .375	102	-	50,000 / 10,000
Cut-To-Length Stretcher Leveling	Aluminum	.125 thru .250	96	636	36,000 / 5,000
	Aluminum	.250 thru .375	84	636	36,000 / 5,000
	Stainless	.125 thru .200	96	636	36,000 / 10,000
	Stainless	.200 thru .250	84	636	36,000 / 10,000
Cut-To-Length Roller Leveling	Aluminum	.030 thru .187	72	500	25,000 / 3,000
	Stainless	.030 thru .125	72	500	25,000 / 3,000
Buffing	Aluminum	.125 thru .375	96	480	-
Sheet / Part Releveling	Alum/Stain	up to 1"	78	288+	-
Shearing	Aluminum	up to .187	120	144	-
	Aluminum	up to .313	60	144	-
	Stainless	up to .125	120	144	-
	Stainless	up to .160	72	144	-

Tolerances

Nominal 1/2 to full AA, ASTM 480 standards or better
